

## Documents about the Career of the late Dr. Lo Wai-hoi and History of MHAHK

C L Wong

**Founding Member and Former Chairman, Executive Committee,  
The Mental Health Association of Hong Kong**

Dr. Wong Chiu-lung, one of the founders of the Association and Chairman of the Executive Committee (1967-69 and 1970-72), has kindly consented to be one of the proposers of the Dr. Lo Wai-hoi Memorial Fund. He was invited to write an article about the life story and career of the late Dr. Lo to be published in this special issue of the Hong Kong Journal of Mental Health. The following are the messages received from Dr. Wong:

*“It was my intention to respond to your invitation. However, you no doubt would recall that at the beginning of 2017, I have posted to you a bundle of documents. They relate to the career of the late Dr. Lo, as well as the history of the MHAHK, including how it came into being. I thought that the documents should best be kept in the archive of the Association. As a result, I no longer have the material which would enable me to contribute to the article in the special issue of the HK Journal of Mental Health. Nevertheless, I sincerely wish the Special Issue would perpetuate the memory of the late Dr. Lo and I am grateful that I have the opportunity to contribute indirectly to this worthy cause. Kind regards,*

*C L Wong”*

# Symposium on Psychosomatic Medicine

personality and history of games and decision making, as well as the historical role of medical games education.

DR W. H. LO (left) and DR J. W. WONG (right).

This group was discussed in connection with the following activities, the report will be available in the other symposium. The group was divided into four sub-groups, though there were highly varied cases of medical involvement with computers. The sub-groups were: (1) the role of computers in measurement and diagnosis in relation to medicine; (2) the role of computers in diagnosis and prognosis; (3) the role of computers in the management of patients; (4) the role of computers in the management of patients in the hospital. The group was divided into four sub-groups, though there were highly varied cases of medical involvement with computers. The sub-groups were: (1) the role of computers in measurement and diagnosis in relation to medicine; (2) the role of computers in diagnosis and prognosis; (3) the role of computers in the management of patients; (4) the role of computers in the management of patients in the hospital.

Dr. W. H. LO, Chief, World Health Centre, Hong Kong, discussed the role of computers in the management of patients. He said that the use of computers in the management of patients is becoming increasingly important. He said that the use of computers in the management of patients is becoming increasingly important. He said that the use of computers in the management of patients is becoming increasingly important.

Table 1: The symptoms of depression

Depression index	1
Anxiety index	2
Hostility	3
Psychotic index	4
Psychosomatic index	5
Index	6

The index showed a 17 point increase in the index of depression, which was in 12 for both depression, in one case. The index was used for 1 year operation and in two other cases was used for 12 months. The index was used for 12 months. The index was used for 12 months. The index was used for 12 months.

The use of computers in the management of patients is becoming increasingly important. The use of computers in the management of patients is becoming increasingly important. The use of computers in the management of patients is becoming increasingly important.

include working hours and pay, city and country benefits, the workers and producers. They had different views and expectations and had to be aware of the effects of inflation and production. They had to be aware of the effects of inflation and production. They had to be aware of the effects of inflation and production.

"The workers' demands were based on the fact that they were in the process of urbanization and that they had to be aware of the effects of inflation and production. They had to be aware of the effects of inflation and production. They had to be aware of the effects of inflation and production."

DR WONG speaking at the conference.

**Relate**  
is based on the job and work of a number of workers. It is based on the job and work of a number of workers. It is based on the job and work of a number of workers.

**Vast**  
The vast Hong Kong population is an extraordinary achievement when considering a vast number of people who have to be housed here. The vast Hong Kong population is an extraordinary achievement when considering a vast number of people who have to be housed here.
